DETAILED ACTION

1. This Office Action is in response to the Amendment filed on November 7, 2006, which paper has been placed of record in the file.
2. Claims 1-7, 9, 12, 16-18, and 20 are pending in this application.

Allowable Subject Matter

3. Claims 1-7, 9, 12, and 16-18 are allowed over the prior arts cited records.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Garcia, U.S. Patent No. 6,272,474.

Regarding to claim 20, Garcia discloses a system to chart trading activity of a market traded security, comprising:

a computer system with a network connection and a display screen;
said display screen showing a cart, said cart having a plurality of price-volume bars, each said price-volume bar corresponding to a consecutive time interval, and

each said price-volume bar being segmented, each segment comprising to one preselected price bracket, and

each said segment having graphical means;

Examiner submits that the claimed invention recites an intended use, although Garcia fails to discuss the intended use which is representing an aggregate volume of trades executed at prices within the corresponding said price bracket and executed during the corresponding said time interval, Garcia's computer system is capable of representing an aggregate volume of trades executed at prices within the corresponding said price bracket and executed during the corresponding said time interval. Therefore, it would have been obvious to one with ordinary skill in the art at the time the invention was made to modify Garcia's to include the feature above for the purpose of representing an aggregate volume of trades executed at prices within the corresponding said price bracket and executed during the corresponding said time interval.

"The recitation of a new intended use for an old product does not make a claim to that old product patentable." *In re Schreiber*, 44 USPQ2d 1429 (Fed. Cir. 1997).

Conclusion

6. Claims 1-7, 9, 12, and 16-18 are allowed.

Claim 20 is rejected.
